

Volunteer's memo

It's a huge pride and joy in our hearts when we understand that all lunches, medicines, toys and a lot of another things we're getting from our beloved volunteers.

It happens when we've got some calls and questions about what can they do for children, for the Centre if they can't support us financially?

You can help us this way:

- to run the master-classes on some important, interesting theme for one of the age groups (the Centre's worker can always coordinate you)
- the professional help - if you are a doctor, lawyer, translator, musician, singer etc., your part can be useful for the Centre and, of course, for the children
- to take part in the cosmetic repair in summer. We often need some people who would like to help us to put things in order in the Centre while the kids get some wellness. If you're full of energy and fun - we'll be grateful for this help, because in such situation we always need some helping hands.

What do you need to do:

to call in the Centre, to speak with its worker, and if in this period your help is topical, you'll come.

The main thing is to listen to and hear the staff members, the people who, as no one in this world, understand the children needs at the moment. To accept and respect the personal space of the kids. Because all that we do, we do for them!

Call our Ivanna and she'll tell you everything
